TIER SKIP

MELEE

this page serves to point out uses for gear that are usually too hard to get or have other factors that make them not the default choice

Pre-Hardmode

by using the strategy mentioned in the External Guides document, you can enter the Dungeon early to obtain the Muramasa and make the Night's Edge before killing Skeletron. Making many bosses of the same tier much easier.

Meteorite Bars can be found early from Gold Chests near the Underworld, making Phaseblades available early. Which can be a helpful support weapon

Hellstone can be obtained before any boss if you get a Golden Bug Net from the Angler and use lava bait to fish Obsidian Crates up

Pre-Mech

if you are able to defeat Duke Fishron early, Flairon will be your Best option for everything until Pre-Golem

Fishron Wings and Shrimpy Truffle also become available though the Wings are quite rare and the Truffle is Expert+ only.

there are several ways to get into the Jungle Temple Pre-Plantera or earlier but the easiest way is to place 3 platforms on the door of the Temple, and hammer each of the Platforms once, then you can walk through the door, just walk into the door while holding down. this will allow access to these items during Pre-Mech through the use of Solar Tablets:

Moon Stone

Neptune's Shell

Bat Wings

Jousting Lances deal more damage as you move faster, with no upper limit, making them theoretically able to achieve damage that's way beyond any other weapon in the game, but this isn't too practical in an actual playthrough due to how complicated it is to set up, a much simpler way to make use of them, is to make a 3 block long rail track, hammer the ends of it twice each, this way, by using a Minecart, you can reach rather impressive speeds while staying still, this can be used for a multitude of bosses by just Facetanking them, and can be applied even better if you were to use Teleporters to Teleport to either side of the Boss
the most effective boss to use this on would be Golem (Shadow Jousting Lance with Minecart)
example video is given in Golem Strategies section

gear for Pre-Mech Duke:

Shadowflame Knife
lower damage
but longer range

Bananarang

Chain Guillotines
lower range but
higher damage

Crystal Assassin armor & Bundle of Balloons can massively help for extra mobility during the fight

gear for Pre-Plantera Duke:

Light Disc

Hallowed armor can be used to have more survivability against Duke's powerful hits

ranking weapon viability on Golem assuming you have gear from Duke Fishron, Empress of Light and the Holiday Moons
